STUDENT PROFILE — STATE-FUNDED

POINTS OF INTEREST

New for Fall 2018 | Bachelor of Applied Science in Applied Management

Students can now earn a Bachelor of Applied Science in Applied Management degree at Skagit Valley College. This two-year, 90-credit degree is designed for associate degree holders and combines upper-level managerial with general education courses. It provides students with contextualized business skills and knowledge for advancement to managerial-level positions or to operate an entrepreneurial venture. SVC's BASAM degree is flexible, affordable, and is designed to accommodate motivated working adults who want to build their management skills and advance professionally. The program includes streamlined entry requirements and integrated instruction to maximize opportunities for educational attainment.

Meeting Employer Needs | Manufacturing Facility Expands

From aircraft to boats to heavy machinery, Washington's rapidly growing manufacturing, composites and aerospace industries are creating jobs that require highly skilled technicians. In response to that need, SVC has expanded its Manufacturing and Composites facility. Students gain hands-on, high-demand skills that employers expect in manufacturing, composites, robotics, technical design, CAD design, technical drawing and quality assurance. Within the composites sector, SVC has taken a leadership role in composite material recycling and reclamation, and technician certification with the American Composites Manufacturer's Association.

Committed to Equity | Racial Justice and Equity Summer Institute

Skagit Valley College is deeply committed to equity as a framework for providing access, supporting achievement and strengthening community. SVC is proud to be one of only 19 colleges and universities nationwide to receive funding from Lumina Foundation's Fund for Racial Justice and Equity. The grant builds upon the innovative work already in place at SVC and it positions the college as a leader in equity throughout the community. With this funding, SVC hosted the first annual Racial Justice and Equity Institute for underrepresented students. The highly successful institute focused on leadership development and college navigational skills for high school students who are attending SVC in fall 2018.
